

Deana Hille

As a resident of Dona Ana county, I emphatically disagree with the approval of this construction. Please do NOT allow this to ruin our local air. Keep in mind that NM is prone to winds that can bring smoke all around the state. These emissions will not be immune to that! This is a hazard to all of us in the area and I do not approve.

There is no benefit to this construction that will ever escape the hurt we have done to our area if this is allowed to be built.
