

Nan Pec

I am writing from Colorado, because a data center anywhere is a threat to people everywhere, the Colorado river basin is in imminent danger of collapse if we pull more water out and this year we have no water to give, data centers take more than a fair share and pollute what remains before giving anything back, AI is a threat to humanity and must be regulated, no one wants another data center.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
