

Oliver NA

Data centers are a waste of space, hurt the environment and are a fucking waste of money, that could be spend helping our earth and not hurting it, they shouldn't exist, Donald Trump is a fucking stupid ass man who has no common sense or care for the only world we live in. If we kill this world we dont get a second chance, data centers should get turned off, stripped away and tossed out, they harm peoples water, they hurt animals with the noise and lights, they use so much water that could be used for the better.
