

Darren Begay

There is no formal greeting between me and Grotesque Developers that have no intention of looking out for the the most vulnerable in our communities. Project: Jupiter has failed time and time again to properly review and put protections in place for the many hazards it will create. From digging up land for pipeline, displacing the water table, Churning up more raw materials in faraway mines, etc... This project is egregious on so many levels for not allowing public comments and concerns to be considered or heard. Many communities in New Mexico suffer from the after effects of so many resources extraction projects that have only poisoned community members who were misled into believing their best interests and safety were being met. Now we're reliving that same nightmare over and over again with Tech Giants extracting more and more resources including our groundwater which is already rare in itself. The historical disrespect to New Mexicos Springs and aquifers should have been enough to stop this project. Hear The public out in Santa Theresa with Spanish Translators because, many community members in New Mexico share this sentiment of not wanting to be poisoned again by out of state entities. Project Jupiter has no intention of making New Mexico safe or prosperous.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
