

Mackenzie Loftus

I do not want this huge data center anywhere near New Mexico. Our water is meant for our citizens and not big tech. We need our water to live, we do not need AI and surveillance to live. We don't want this. Our river is already dry, it can't handle another source drinking up all our water. New Mexico already has enough issues we need to face, water should not be one. We've seen what data centers do to people's water, making it dirty and disgusting while the data center takes all the clean water to cool the servers. It's not fair, it's not right, and it's disgusting that they want to force this on us. This will not make our country better nor will it make our city better. Data centers are horrible for the environment as well, we don't want them here. Our land and water belong to New Mexicans, not big tech giants who don't care about us or our water or environment.
