

Michael Hutchins

On July 1, 2026, I inadvertently stated in my comments opposing Yucca Growth Infrastructure's permit application that: "Adding 25 billion tons of greenhouse gases annually to the region's active and long-time non-attainment zone should not be approved through their permit application." I am updating my comment to state: "Adding 14 billion tons of greenhouse gases annually to the region's active and long-time non-attainment zone should not be approved through their permit application."
