

## Dustin Flannery-McCoy

I am New Mexico resident who was born and raised here in the state, and am now raising my own family here- and we are **STRONGLY AGAINST** this so called "project Jupiter" in every way, shape , and form. A data center whose emissions will be more than all the cities in the state combined? And using more energy as well? And how about the water use? Millions of gallons of waters needed every day? And building and natural gas pipeline through our beautiful landscape? This is a project that will do incredible harm to New Mexico, to the benefit and greed of tech giants like Oracle, who are so slimy that they name their projects "green chile pipeline" and "yucca growth infrastructure" to try and give the appearance of being home grown, when in reality they are just trying to hoodwink people. We must fight against this kind of hostile takeover from the greedy and corrupt forces that are behind this project. Together we can keep projects as destructive as these out of NM.

Thank you,  
Dustin Flannery-McCoy
