

Louise Gonzalves

Project Jupiter is one more project destroying our planet. Without nature, we are nothing. The more we consume and destroy, the sooner is our extinction. We aren't doing anything to prevent it because economy and money overweights human values, which is totally messed up. You think economic growth is more important than the quality of the aire we breathe, of the water we drink, of the ground we plant our food in.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
