

Abdul Akinleye

Dear NMED Staff, My name is Abdul Akinleye and I may not be a resident of New Mexico but I find Project Jupiter incredibly concerning. We live in a day and age where artificial intelligence is prioritized over natural life. This construct threatens what this planet has nurtured for millions of years. If Project Jupiter is carried out, it sets a precedent, a baseline, a record ready to be broken. Today it may be the largest data center but tomorrow it could be an ant compared to others. It may not be in my backyard now but that doesn't stop it from being an issue. Don't take charge until it's in your backyard. Take charge now! I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Take charge and take back control. This is our world, this is our resources, this is our responsibility.
