

Talia Skinner

America doesn't want data centers. America doesn't want ai in every form of media and every job. It NEEDS clean water. It NEEDS land to live in. The administration keeps talking about those stealing jobs and taking up our land when they are the only ones allowing it to happen. The only thing that can steal a human job is something inhuman. Get ai out of our faces, no one wants it besides rich people to excuse their own laziness. "Oh, but the public has it-" great fucking excuse for destroying the land we CREATE life on and in the process, the entire world. Once again, America is a global disappointment.
