

Annie Ersinghaus

I was born and raised here in Las Cruces. I do NOT want this project in my home, nor do I want its pollution. We cannot afford this continued destruction to our land, air, and water. We cannot afford more fossils fuels to be burned with the damage that is already happening to our climate. The public should be given an additional 60 days to review and comment on this air quality permit so community members can participate equitably. This permit application should be denied. If not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. This is a project brought on by billionaires. This project will NOT bring any benefit to our community. I urge you to deny this project. The community does not want this. Deny this project, please.
