

Valentina Valdez

I am vehemently OPPOSED to the approval of this permit! As a citizen of New Mexico and a person with a long generational history in the area, this project stands to hurt ALL of New Mexico. These corporations do not have the best interests of people in mind; they care about profits. The long-term effects on our children will be devastating. Our communities deserve clean air. We are already as a state running low on water. This is not the best use of our water resources. No one has asked for AI, it is being pushed on us by class oligarchs. We deserve better, and the officials in charge of reviewing the permits, please remember that you serve the citizenry of this State. Our voices need to be heard. Please please please DENY this permit!
