

Kimmuriel Oblodera

Dear NMED,

I am writing to you to urge you to deny project jupiter and all proposals associated with it. At this point, this comment section is a complete joke. These corpulent disgusting companies are not getting the support they want, so they are resorting, once again, to leave mass amounts of artificial comments claiming support of the project. Bloom Energy has a criminal past, there is next to no actual information about this project (though it does not take a genius to know that the massive amounts of pollutants produced, which they refuse to actually meaningfully expand or comment on, will seriously harm residents, including innocent children. This will very well end up killing many people.

Reject Project Jupiter.

Sincerely,
Kimmuriel Oblodera
