I am a citizen from the Philippines I do not live near the Project Jupiter or live in the same country. I am asking that you deny Yucca Growth Infrastructure's air quality permit. I care about our planet that have been taking care of us long before everything was discovered. The Earth is the planet that we only have so destroying her will only destroy us, it's like putting a hole in your own home. The people's health will be in danger, maybe not now but someday. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. The people and Earth's life could be in danger. The public should be given an additional 60 days to review and comment on the air quality allowing community members to participate equitably.
