

Kristina Grujoska

Polluting the limited drinkable water sources and drying them up completely is not worth it to have some ai that people will use just to ask about their symptoms and what they should do and search up the basic stuff on which we can get answers by opening a book or getting a doctor's appointment like we used to before. Stop wasting our water resources it is really not worth it we can't live off money and we can't live without water and food.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
