Why? Why are you killing us? This is a nightmare we can literally prevent but you're genuinely proposing a climate disaster. Yet you're playing it off with big fancy words and a stupid false future where everything is great. We don't need to be perfect! God forbid i want to be human. We will die but the earth won't. the earth will recover. We will die and we won't be here - YOU won't be here to see it regrow. I want to live. I want to live my life and watch my family grow old. I want to enjoy stupid moments with my family. Yet, for some reason it is selfish. It's selfish for me to want a life not made for efficiency but for being human and for being imperfect. But building this data centre was never for perfection was it? You want control and money and now we are going to pay the price for your cruelty. This is a front and people know it. One day when everything is ruined for us this will come back and bite you. When we are dead or if you survive somehow you will realise your mistakes and it will be too late. At minimum, give the community an additional 60 days to review and comment. If you let this air permit pass you are literally allowing people to inevitably succumb to harm or even death. Please deny it. And if for some forsaken reason it is accepted we demand a hearing in Santa Theresa. Please don't make this mistake.
