

Mireya Ramento Ho

I believe we do not have the resources to support this. I believe our water and air are at risk plus possible health risks for us and our future generations not to mention the environmental disaster this will be. I know the good ole' boys in marketing are doing their best to make this seem like the greatest idea and they have when donated a couple million to NM education and programs but I believe this is bribery.

Look you really want our community's support? Then put your money where your mouth is. If this is going to create jobs, be low impact on the environment be the best thing since sliced bread for us in drought- stricken, poor air/ water quality already communities like Santa Teresa, Sunland Park and Anapra, then why not create a 10 billion dollar medical, environmental initiative that the people in our communities can have just in case things go south. According to Protect Jupiter and cronies, sell-out politicians with shares in this, it's gonna be the best thing. Put your money where your mouth is. Set aside 10 billion and we will wait 20 years to see what happens. But in my opinion, cancel cancel cancel-I don't believe a word of this. I don't support this and want this comment to really be on record so we can as a community can sue whomever supported this in the future.
