

Luke T

Do not allow this garbage to be constructed in our state. New Mexico is in a drought, just look at the Rio Grande; the last thing any regular person that lives here wants is for our air to be polluted and our water to be diverted to the cause of an AI data center. This is bad for everyone that isn't rich or a company. There is nothing to gain from this and everything to lose. Stop sacrificing our home for the sake of making a profit.
