

Jhon Doe

I want clean air, water and to have a fresh breeze. Is that too much to ask? We don't need AI at all, we can live without it; AI is doing more harm than benefiting us. We only have ONE planet and we need to make sure our future generations have something left. What will you do then you cant reverse YOUR actions, when we have NOTHING left but pollution? What now? I know what u can do to make sure that doesn't happen! DON'T ALLOW THEM TO MAKE DATA CENTERS, STOP AI USE!! It's really that easy! Say no to AI!
