

Kindra Gregory

As a homeowner, here in Las Cruces, we are concerned about the harsh and permanent impacts that the data center will have on our city and community. We already have water scarcity, high temperatures, and terrible air quality, I'm failing to see how this is going to benefit anyone that is living here, this is going to poison us. Las Cruces is a beautiful place to be, if we take care of it, please don't ruin our land. We ask that you give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Also, the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Thank you for your time, but more so, thank you for caring.
