

Alex vick

Project Jupiter will RUIN new Mexico and the world. The world is suffering and adding an AI data center in a desert town, and one that will use over 5 million gallons of water a DAY will forever ruin the world, please. I'm 17, I want to have a life and if project Jupiter gets signed off on I might not have one. Please do right, we need it to better, we don't need ai.

Please listen to me, hear me, I'm a real person, and I'm so scared, this will ruin our home, our animals home our kids home, please hear me.
