

Aeyeshia Montalvo

I am against Project Jupiter.

Project Jupiter harms New Mexico. Project Jupiter releases hazardous pollutants such as nitrous oxide and carbon monoxide into New Mexico's air. Project Jupiter's greenhouse gas emissions would exceed in polluting New Mexico's air by current greenhouse emissions created by New Mexico's largest cities-Santa Fe, Albuquerque, and Las Cruces. Project Jupiter harms our communities, our environment, our water, and our ecosystems.

I am against Project Jupiter.
