

Daniel Gallegos

These permits must be denied. Project Jupiter will be responsible for dumping insane amounts of carbon pollution into the air, ruining our beautiful state, and raising local temperatures up to unlivable degrees. This will literally kill New Mexicans, and it has no place here. Not to mention, the construction of these data centers will result in the loss of hundreds to thousands of jobs once these facilities are up and running. I'm a voter and I want these AI corporations and data centers far away from our New Mexico communities. Oracle's Project Jupiter is not welcome in New Mexico
