

Christopher Currie

I, as a resident and local vehemently oppose any and all proposals for data center construction or operation in the state of New Mexico.

Further more I believe we should vote out any and all state representatives that have undermined the public to push these projects through.

To put it bluntly WE HAVE NO WATER and the desert is not an empty place for your toxic waste.

Not only do we not want the data centers we do not want what they provide.

Please leave New Mexico and never come back.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
