

Alison Halbleib

I vehemently oppose project Jupiter as it places an enormous burden on our limited natural resources. Moreover, I have significant concerns, not only about water consumption and quantity, but also about environmental and noise pollution. The lack of transparency on the impact of this data center and empty promises of their canvassing and social media propaganda leave the people of Dona Ana county at great risk. The local community will bear the long-term consequences, while the economic gains will not be reinvested back in the community. We are the land of enchantment and I plead with you to keep it that way for future generations.
