

Steven Mizcles

Not beneficial at all for our geological location. We are in a drought as it is. Anyone who's is qualified for jobs is not gonna be from las cruces. No one could've guessed they would've built a high capacity, high qualification, degree. Yes It might bring up the economy. But it'll only last so long. Las Cruces is already over crowded. That's just my opinion. Hope it helps to whom it concerns.
