This needs to be stopped! We were perfectly fine without the use of A.I. it doesn't make you smarter, it doesn't make anything better these data centers just ruin our air, water, environment and more, my city has fallen victim to this. We barely have any water left and we were told we would run out of last month, I haven't been told any updates but there is no reason cities should be RUNNING OUT OF WATER! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
