

Makenzie Meacham

The last thing this parched land needs is a data center. Disgusting of Yucca Growth Infrastructure to be pushing this project on this community. They are ignoring the wants of New Mexicans, lying about the support they have, and acting like the economic benefit will be worth all the environmental destruction. They do not care about the environment and are only pretending to care for it when they must, e.g. switching to fuel cells only after receiving backlash. They will not be proactive about protecting the environment, building a data center in a drought stricken desert is proof enough their only interest is profit, whatever the cost. I wholly disagree with further development of Project Jupiter.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
