

## Anne Clark

I would like ask for the rejection of Project Jupiter. I, my family, friends, and the majority of the residents of our beautiful state do not want our land, our homes, and our wildlife to be destroyed in order to line the pockets of billionaires, corporations, and tech giants. AI is not even close to worth the cost of our already very limited resources. We do not want or need more data centers. We want, need, and deserve clean air. We want, need, and deserve clean water. We want, need, and deserve the peace of existing without the hum of technology in our open pastures. We, as well as our beautiful wildlife, water sources, and plants need this land to survive. We cannot live, work, and thrive in an environment filled with noise pollution, water pollution, and air pollution. I implore you to put the wellbeing of the residents of New Mexico before the wellbeing of billionaires' bank accounts. Please do better and be better, and stop this project now. We all deserve better. Thank you.
