

Paul Alley

We can live without AI, we don't need this data center, but we do need clean water and a livable planet. I believe the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Due to the history of dumping hazardous waste on Bloom Energy's part, the air quality application should be DENIED. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English AND Spanish, with an option to participate virtually.
