Building Project Jupiter has no benefits to the people of the USA, especially those in New Mexico. Data centers contribute dangerous amounts of pollution, both air and sound included and waste our limited water sources. An AI data center is not worth the water usage, especially when the AI bubble pops and your department has to reevaluate the damage they've done if they let this project continue. Don't go through with Project Jupiter.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
