

Shane Dobbins

There is absolutely NO reason a mega ai data center should be built anywhere in the world data centers are nothing but awful to the world by 2060 or so we won't have clean drinking water cause of these said data centers they create problems with water they use so much water to cool their internals and they use chemicals mixed into the water to help cool the data centers it's just plan out awful for the world it's sad that they want to build it instead of trying to do something nice for the world.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
