

Thomas Muniz

I am not in support of any Jupiter project and what resources they need to be active and useful I do not agree with the water consumption with the energy that is produced and the heat for local residents and wildlife project Jupiter is not welcome in New Mexico please go somewhere underwater like the ocean or somewhere else but we do not need the jobs will not be created for local people because they are going to be Way out of reach and it the the local education will not benefit and and jobs will go down because labor will be powered by ai and AI would be taking jobs away from people so I am in no support for this project at all it hurts New Mexico it hurts humanity but I hope you guys are doing well and make better choices with projects in New Mexico because this one we cannot afford to have.
