

Jaydin Sanchez

I am a resident in hobbs nm . If this continues our air will become polluted and we are already suffering in a drought this will take more water. The heat will rise higher with the pollution when we are already experiencing heat of 109 increasing the pollution this heat will be as cold as it gets . If we loose our water we loose our animals and we are loosing more than we are gaining. We will get carbon dioxide poisoning daily and these are powered by nuclear reactors one wrong make or move our state will be gone . Our air will cause us to have seizures lung problems can you imagine how our children will suffer .
