

Marley Lane

Why would you destroy such a beautiful ecosystem and life. It does not make sense. We have survived without generative AI and we will again. So don't you dare hurt huge amount of peoples lives and the whole ecosystem. We are people and we live on the earth we do not control the earth, so you should not dirty up the water just to cool down your data center. If you care about the environment and the people who live there you would not build this. This will show who you really are and how greedy you can get with AI. The blood of a destroyed ecosystem will be on your hands. Sit and think about it. I have some asks for the public to be given atleast 60 additional days to review and comment on the air quality permit so community members can participate equally. This air quality permits should also be denied because of Bloom Energy's history of illegally dumping hazardous waste. If the permit is not denied then i also ask that a public hearing needs to be held in Santa Teresa, in both english and spanish with an option to participate virtually. Have a great day. I finally ask not to make this because it would become government sponsored environmental racism as residents of Doña Ana County are already disproportionately affected by environmental Pollution. Please sit and think about how this will ruin stuff. Maybe it will make a lot of money but destroying the way of life for the ecosystem and people around it is not worth any money and conservation efforts to fix damage will take more money and too much time to help the ecosystem. Have a great day
