

Daniel Garcia

AI data centers are a horrible drain on environmental resources- using ridiculous amounts of water and producing pollution like crazy. Having these despicable monstrosities in a location as fragile as the desert ecosystem is madness! Look past momentary enrichment and greed to the sustainable future that doesn't involve destroying the beautiful NM desert. As a native of Las Cruces who has lived in the PNW for decades the wide open spaces and natural beauty of southern NM is totally unique. Don't ruin your way of life for some ridiculous tech trend - don't sell your soul for shiny new buildings - realize how special your place in the world is and protect it. D Garcia
