Why would you willingly choose to harm the earth knowing its already bad? This project not only takes EVEN MORE WATER from spaces but also harms the ecosystem and disrupts the already disrupted natural order. And for it to be in the middle of the dessert will only make things worse. This project will not benefit anyone, not even the rich. It will steal from everyone regardless of wealth and living conditions. Not only is this disrupting earth but its disrupting earths atmosphere and will harm it severely, possibly making it harder to breathe, and overall harder to live. We barely have 5 years to even save the planet, so choosing to do this project lowers the chances of saving the very planet that gives us life will only take our lives instead. Also i hope the center gets sucked in by a sinkhole and all your money and work gets sunk into the earth
