

Derrick Pacheco

This air permit should not be granted. This is ASARCO 2.0. The borderland from Horizon to Sunland is a polluted mess as it is; simply take a drive from Las Cruces across El Paso to see for yourself how bad the air quality has gotten. The news regarding the Project Jupiter canvassers and the signatures submitted not matching the wishes of the signee should also be taken into account. Any corporation trying to game the system should be scrutinized even more than your standard application. We have a history of allowing these extractive industries into NM with no recourse and now we're facing a water bankruptcy. Time for things to change or we'll have nothing left to fight for.
