Rio Grande WILL dry up before summer even begins. I DO NOT TRUST building the largest data center in the WORLD wouldn't threaten the limited water our communities depend on to survive. THIS IS A CLIMATE CRISIS! Project Jupiter's fuel cells will also release 10 million tons of carbon dioxide into our air. Essentially polluting us! This is our chance to stop it! A public hearing needs to be held in Santa Teresa in both English and Spanish and an option to attend virtually. The public should also be given 60 days to investigate Project Jupiter and comment on the air quality permit. This is government-sponsored environmental racism for the people living in Doña Ana County as if they weren't already being impacted by environmental pollution.
