I am a citizen of the United States of America and I oppose the idea of further polluting our earth; that is why I asking you to deny Yucca Growth Infrastructure's air quality permit. Adding 10 million tons of pollution to our air will only harm us and other living creatures. People do research about air pollution and the data shows that such pollution damages our air quality and quality of life. Implementing a permit that creates an environmental crisis should not be allowed to enact. I will not live in a desolate environment drained of resources for the sake of entertainment; entertainment does not feed us. This will not only kill our environment and exacerbate climate change, but it will harm living beings for the sake of a nonliving, nonessential reason. To have future generations endure such a devastating climate for years to come is only fueling the greed of humans. We will not survive if we allow this to happen. Please, for the sake of all living, do not let the nonliving be the only ones on earth.
