To whom it may concern at the Air Quality Bureau of the New Mexico Environmental Department:
do the right thing for the environmental well-being of our future.

Project Jupiter air permits should not be approved for a plethora of reasons, but primarily for the sake of our future, for the sake of the present, and for the sake of our river. The public should be given 60 more days to review and comment on the permit. I do not believe that the application permit should be flat out denied.
