

## Angela Zaffee

I am writing to give my reserved approval for Project Jupiter.

If the things I heard about adding 1500 permanent jobs to NM, a one time water full-up, and a micro grid to generate its own power, I would be for the project.

I just want the project to employ New Mexicans, not add more pollutants than necessary to the environment, stick to their one time fill up, and have minimal noise.

If they company can stick to these promises, Ill give my support.

Sincerely,  
Angela Zaffer
