

Tanner Guskey

As a resident, I am concerned of the impact the heavy methane use will have on our community health and safety. I am also concerned that the gas will contribute to our greenhouse gas output and ultimately our acceleration of increased temperatures in our region. As a trained Archeologist, I am concerned about the impact of the buried pipeline on cultural resources and the danger of a leak.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
