

Vale n/a

My name is vale. I am a New Mexico resident, living in Carlsbad , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. Project Jupiter's power plant is said to release up to 10 million tons of climate-warming greenhouse gasses every year, this is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. Also the Santa Teresa Elementary and High School are located within five miles of this project site. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs, the Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. if you really cared about the people of New Mexico I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid, If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Vale
