

Emily Hernandez

Humans have lived without AI centers for thousands of years. We haven't been able to live without water though. So why take that away? In the end it affects the wildlife, you, and me. Your money won't be valuable when you're fighting to find droplets of water. When you die of dehydration you'll be wondering, why? Because it starts with one data center, then one becomes 10, then 10 to hundreds of thousands. End AI centers, save our planet, communities, and people.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
