Scientists have set themselves on fire in efforts to wake our world up to the realities of climate change. And projects like this jeer at and insult the meaning of their sacrifices. There is no sin or crime humanity could commit that is more selfish, egotistical, and careless than the acceleration of global warming... and Project Jupiter is essentially giving this looming threat a push forward. Please stop them from exhausting our planet and our people in the name of money and dreams of masses of wealth. This is evil.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
