

Lilo Kard

As our climate is already warming up, the last thing we need is more unnecessary data centres that will damage the environment and create less job opportunities. We want a future with life not robots, NOT ai! There is no positive gain as a society from genAI, the only people it helps are already the rich who have no reason to get richer except for greed. Stop this madness and help us create a better future! Please!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
