

Gary Reger

I am adamantly and completely opposed to the issuance of any air quality permit to Project Jupiter, for any cause whatsoever. We have more than enough air quality issues here without adding Jupiter's toxicity to the air we breathe. We face a climate emergency, but these people want to release 19 million tons/year of CO₂. Bloom has been fined \$1.6 billion for pollution crimes in the past—their claims cannot be believed. This outrage must stop now, for good.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
