

Sophia Cabrera

By allowing trump to do this you will be helping bring animals to extinction and worsen climate change. Thousands of animals are on the brink of extinction and entire ecosystems are dying. This is one of the last "cold summers" we will have due to climate change even though it is already dangerously hot. There are so many things wrong with our planet that we need to fix and take action against or else more than half of animal species will be either extinct or dangerously close to it and our planet will become closer to its end. By stopping this you will help take a step forward to protect our animals and their habitats. Polar bears have been close to extinction for a while now but it has only gotten significantly worse to the point where if we don't do something now, they will go extinct and there will be no saving them nor the arctic. So many other animals can be harmed by this as well. So, do you want to be the problem or the solution? The time is now to stand up and protect the world we live in and everything that lives in it. Do you want to be the change or the reason for another handful of animal species to go extinct? We can make a difference if you and our leaders wake up and realize the problem at hand. We need to act NOW before it's too late. Do you really want to look back in the next few years and regret ignoring that we are the problem and the reason our planet is dying when you could've done something to help? I know i don't. Let's make a change together one step at a time. We as not only as a country but a world can slowly come together to pick up the pieces and save the planet we love so much. For the past few decades we've done nothing but harm our world and be selfish to the planet and all that lives in it, we could change that and make up for all the harm we've done before it's too late. Make the difference. Don't allow Project Jupiter to happen; and bring our world back to happiness and unity.

In addition to my previous comment I'd like to add that i agree with the following statements: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Let's work together to save the arctic and then the world.
