

Ruby-Belle Stingemore

We, the people, strongly oppose 'Project Jupiter', and its plan to build a data centre—especially within a rare and finite ecosystem. This proposed data centre will bring immense amounts of pollution to the area, causing catastrophic damage. Please consider the immediate but also long-term effects that these structures have on a local and global scale. You cannot in good conscience, plan and execute mass destruction as you are planning to do. You do not own our planet, and you cannot have the ability to destroy it.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
